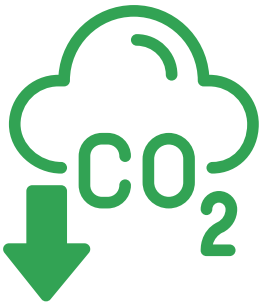
CLIMATE CHANGE
TE HURINGA AAHUARANGI

What actions reduce Co2 the most?

2+ tonnes CO2e/capita:

- Go car free
- Shift from petrol/diesel to EV or BEV
- Reduce Long-Haul Flights

What is 2 tonnes of Co2e equivalent to?
Driving 1,300km.
Or 2 round the world flights.
Or 1.3 households' average power for a year

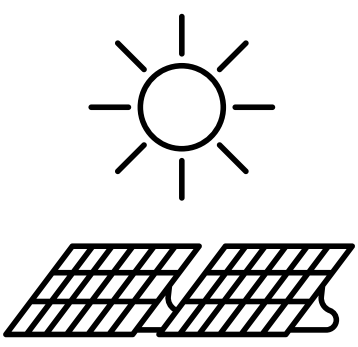


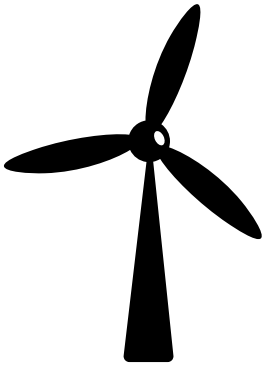
1-2 tCO2e/capita:

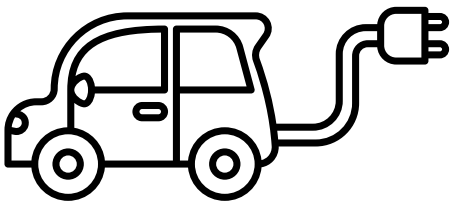
- Take one less flight (long distance return)
- Use renewable electricity
- Produce renewable electricity (e.g. solar).

0.5-1 tCO2e/capita:

- Shift from car use to public transport
- Take one less flight (medium distance return)
- Adopt a vegan, vegetarian, mediterranean or similar low-meat diet
- Heat pump
- Passive house
- Switch to Renewable Energy







0.5 tCO2e/capita

- Telecommuting
- Carpooling/sharing; fuel efficient driving
- Food waste reduction
- Less packaging
- Saving hot water; smart metering; more insulation
- Walk instead of bus

How can I save money?	Approximate savings per annum
Switch off appliances at the wall	$100
Reduce your shower time from 15 to 5 mins	$500
Switch to LED light bulbs	$100
Set your heat pump to a max of 21 degrees	$320
Fix a dripping hot tap	$200
Change your power plan	$300
Use cold water washing clothes	$80
Switch heated towel rail off	$140
Hot water cylinder wrap (A Grade vs old cylinder)	$50
Not using a second fridge (old model)	$200
